

# KB - Wordpress - Réinitialiser le mot de passe

Applicable à : Wordpress toutes versions.

## Symptôme(s)

Le mot de passe wordpress du compte admin ne fonctionne pas.

[image.png](#)

## Problème

Mot de passe perdu, oublié ou changé.

## Solutions

### Requête SQL

**Prérequis** : Accès à la base de donnée.

Se connecter au serveur de base de donnée avec des privilèges suffisants pour modifier la base.

Utiliser la requête :

```
UPDATE `mabddwordpress`.`wp2021_users` SET user_pass=MD5('MotDePasse') WHERE ID = 1;
```

## Wordpress CLI

Sur le serveur web hébergeant le Wordpress, aller dans le répertoire wordpress.

Utiliser la commande suivante pour récupérer l'ID utilisateur.

```
wp user list
```

Puis la commande suivante pour réinitialiser le mot de passe.

```
wp user update <ID> --user_pass=MotDePasse
```

## Script PHP

**Attention** : Cette page est exposée le temps de la manipulation et accessible à tout le monde. Aussi il ne faut l'utiliser qu'en dernier recours et bien penser à la supprimer immédiatement après utilisation.

Wordpress a créé un script d'urgence PHP qui permet de réinitialiser le mot de passe.

A la racine du répertoire web de wordpress, créer une page appelée '**emergency.php**'.

\*/

```
require './wp-blog-header.php';
```

```
function meh() {
```

```
    global $wpdb;
```

```
    if ( isset( $_POST['update'] ) ) {
```

```
        $user_login = ( empty( $_POST['e-name'] ) ? '' : sanitize_user( $_POST['e-name'] ) );
```

```
        $user_pass = ( empty( $_POST['e-pass'] ) ? '' : $_POST['e-pass'] );
```

```
        $answer = ( empty( $user_login ) ? '<div id="message" class="updated fade"><p><strong>The  
user name field is empty.</strong></p></div>' : '' );
```

```
        $answer .= ( empty( $user_pass ) ? '<div id="message" class="updated fade"><p><strong>The  
password field is empty.</strong></p></div>' : '' );
```

```
        if ( $user_login != $wpdb->get_var( "SELECT user_login FROM $wpdb->users WHERE ID = '1'  
LIMIT 1" ) ) {
```

```
            $answer .="<div id='message' class='updated fade"><p><strong>That is not the correct  
administrator username.</strong></p></div>";
```

```
        }
```

```
        if ( empty( $answer ) ) {
```

```
            $wpdb->query( "UPDATE $wpdb->users SET user_pass = MD5('$user_pass'), user_activation_key  
= '' WHERE user_login = '$user_login'" );
```

```
            $plaintext_pass = $user_pass;
```

```
            $message = __( 'Someone, hopefully you, has reset the Administrator password for your  
WordPress blog. Details follow:' ). "\r\n";
```

```
            $message .= sprintf( __( 'Username: %s' ), $user_login ) . "\r\n";
```

```
            $message .= sprintf( __( 'Password: %s' ), $plaintext_pass ) . "\r\n";
```

```
            @wp_mail( get_option( 'admin_email' ), sprintf( __( '[%s] Your WordPress administrator
```

```

password has been changed!' ), get_option( 'blogname' ) ), $message );

<p><strong>Your password has been
successfully changed</strong></p><p><strong>An e-mail with this information has been
dispatched to the WordPress blog administrator</strong></p><p><strong>You should now
delete this file off your server. DO NOT LEAVE IT UP FOR SOMEONE ELSE TO
FIND!</strong></p></div>";
}
}

return empty( $answer ) ? false : $answer;
}

$answer = meh();
?>
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">
<html xmlns="http://www.w3.org/1999/xhtml">
<head>
<title>WordPress Emergency PassWord Reset</title>
<meta http-equiv="Content-Type" content="<?php bloginfo( 'html_type' ); ?>; charset=<?php
bloginfo( 'charset' ); ?>" />
<link rel="stylesheet" href="<?php bloginfo( 'wpurl' ); ?>/wp-admin/wp-
admin.css?version=<?php bloginfo( 'version' ); ?>" type="text/css" />
</head>
<body>
<div class="wrap">
<form method="post" action="">
<h2>WordPress Emergency PassWord Reset</h2>
<p><strong>Your use of this script is at your sole risk. All code is provided "as -is",
without any warranty, whether express or implied, of its accuracy, completeness. Further,
I shall not be liable for any damages you may sustain by using this script, whether
direct, indirect, special, incidental or consequential.</strong></p>
<p>This script is intended to be used as <strong>a last resort</strong> by WordPress
administrators that are unable to access the database.

Usage of this script requires that you know the Administrator's user name for the
WordPress install. (For most installs, that is going to be "admin" without the
quotes.)</p>
<?php
echo $answer;

```

```

<?>
<p class="submit"><input type="submit" name="update" value="Update Options" /></p>

<fieldset class="options">
  <legend>WordPress Administrator</legend>
  <label><?php _e( 'Enter Username:' ) ?><br />
  <input type="text" name="e-name" id="e-name" class="input" value="<?php echo
attribute_escape( stripslashes( $_POST['e-name'] ) ); ?>" size="20" tabindex="10"
/></label>
</fieldset>
<fieldset class="options">
  <legend>Password</legend>
  <label><?php _e( 'Enter New Password:' ) ?><br />
  <input type="text" name="e-pass" id="e-pass" class="input" value="<?php echo
attribute_escape( stripslashes( $_POST['e-pass'] ) ); ?>" size="25" tabindex="20"
/></label>
</fieldset>

<p class="submit"><input type="submit" name="update" value="Update Options" /></p>
</form>
</div>
</body>
</html>
<?php exit; ?>

```

Utiliser ensuite '<https://<votre url wordpress>/emergency.php>' pour changer le mot de passe.
