KB-Windows11 - Bypass réseau lors de l'installation

Applicable à : Windows 11 toutes versions.

Symptôme(s)

Lors de l'installation de windows 11. Une connexion internet est requise. Cependant, dans le cadre d'installation de VM, il n'est pas toujours possible de disposer de cette connexion. Hors, cela bloque l'installation.

Let's connect you to a network

You'll need an internet connection to continue setting up your device. Once connected, you'll get the latest features and security updates.

If you need to install a network adapter driver, download it from your device manufacturer's website or from the maker of your network adapter.

Unidentified network
No Internet

Next

Problème

Microsoft bloque l'installation si le réseau n'est pas connecté.

Solution

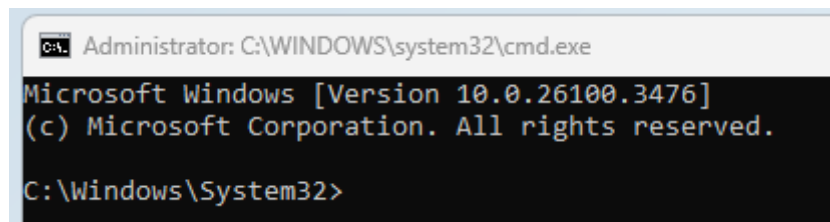

Prérequis : aucun en particulier

Il existe 3 méthodes pour passer outre ce prérequis.

Méthode 1 - BypassNRO

Sur l'écran ci-dessus, appuyer sur '**shift+F10**'.

Une console s'ouvre.

```
Administrator: C:\WINDOWS\system32\cmd.exe
Microsoft Windows [Version 10.0.26100.3476]
(c) Microsoft Corporation. All rights reserved.
C:\Windows\System32>
```

Entrer la commande suivante : '**oobe\bypassnro**'.

Le PC va alors redémarrer.

Et cette fois-ci, l'option pour indiquer que l'on '**I don't have internet**' est disponible.

Please review the Licence Agreement

Last updated April 2024

MICROSOFT SOFTWARE LICENSE TERMS

WINDOWS OPERATING SYSTEM

IF YOU LIVE IN (OR IF YOUR PRINCIPAL PLACE OF BUSINESS IS IN) THE UNITED STATES, PLEASE READ THE BINDING ARBITRATION CLAUSE AND CLASS ACTION WAIVER IN SECTION 11. IT AFFECTS HOW DISPUTES ARE RESOLVED.

Thank you for choosing Microsoft!

Depending on how you obtained the Windows software, this is a license agreement between (i) you and the device manufacturer or software installer that distributes the software with your device; or (ii) you and Microsoft Corporation (or, based on where you live or, if a business, where your principal place of business is located, one of its affiliates) if you acquired the software from a retailer. Microsoft is the device manufacturer for devices produced by Microsoft or one of its affiliates, and Microsoft is the retailer if you acquired the software directly from Microsoft. If you are a volume license customer, use of this software is subject to your volume license agreement rather than this agreement.

Accept

Méthode 2 - Clé de registre

Si la méthode 1 ne fonctionne pas (Microsoft est en train de retirer cette option OOBÉ dans certaines versions de windows).

Il est possible de jouer sur la clé de registre qui gère cette étape de l'installation.

Sur l'écran ci-dessus, appuyer sur '**shift+F10**'.

Une console s'ouvre.

```
Administrator: C:\WINDOWS\system32\cmd.exe
Microsoft Windows [Version 10.0.26100.3476]
(c) Microsoft Corporation. All rights reserved.
C:\Windows\System32>
```

Entrer la commande suivante pour ajouter la clé de registre correspondant à l'option OOBE qui n'est plus accessible.

La seconde commande redémarre l'ordinateur.

```
reg add HKLM\SOFTWARE\Microsoft\Windows\CurrentVersion\OOBE /v BypassNRO /t REG_DWORD /d 1 /f  
shutdown /r /t 0
```

```
C:\Windows\System32>reg add HKLM\SOFTWARE\Microsoft\Windows\CurrentVersion\OOBE /v BypassNRO /t REG_DWORD /d 1 /f  
The operation completed successfully.
```

Le PC va alors redémarrer.

Et cette fois-ci, l'option pour indiquer que l'on '***I don't have internet***' est disponible.

Méthode 3 - Commande bash

Enfin, si les deux méthodes au-dessus s'avèrent obsolètes, il existe une troisième méthode qui consiste à lancer un script shell permettant de créer un utilisateur local directement.

Sur l'écran ci-dessus, appuyer sur '**shift+F10**'.

Une console s'ouvre.

```
Administrator: C:\WINDOWS\system32\cmd.exe
Microsoft Windows [Version 10.0.26100.3476]
(c) Microsoft Corporation. All rights reserved.
C:\Windows\System32>
```

Entrer la commande suivante :

```
start ms-cxh:localonly
```

Cela ouvre l'interface legacy de création de compte. En remplissant les champs et cliquant sur '**Next**' il est possible de continuer l'installation.

Microsoft account

Create a user for this PC

If this account is for a child or teenager, consider selecting **Back** and creating a Microsoft account. When younger family members log in with a Microsoft account, they'll have privacy protections focused on their age.

If you want to use a password, choose something that will be easy for you to remember but hard for others to guess.

Who's going to use this PC?

Username

Enter your username.

Make it secure.

This might take a few minutes.

Don't turn off your PC

Let Microsoft and apps use your location

Choose your settings, then select **Accept** to save them. Check the **Learn more** link for info on these settings, how to change them, how Windows helps protect you from unsafe apps and web content, and the related data transfers and uses.

 Yes

Get location-based experiences like directions and weather. Let Windows & apps request your location. Microsoft will use location data to improve location services.

 No

You won't be able to get location-based experiences like directions and weather or enjoy other services that require your location to work.
